this book investigates the practicability and effectiveness of the concept map as a tool  
for assessing students conceptual understanding in mathematics the author first  
introduces concept mapping and then employs it to investigate students conceptual  
understanding of four different mathematical topics alongside traditional scoring  
methods she adopts social network analysis a new technique to interpret student  
constructed concept maps which reveals fresh insights into the graphic features of the  
concept map and into how students connect mathematical concepts by comparing  
two traditional school tests with the concept map she examines its concurrent validity  
and discusses its strengths and drawbacks from the viewpoint of assessing conceptual  
understanding with self designed questionnaires interviews and open ended writing  
tasks she also investigates students and teachers attitudes toward concept mapping  
and describes the implications these findings may have for concept mapping s use in
